IDC Componentes is a Mexico-based company developing specialized micro-component technology from lighting to IoT solutions. A company producing lighting technology shouldn't have its **production management** left in the dark.

Miguel Salazar, Manager at IDC Componentes

“We chose Katana because it presents our manufacturing business information in the easiest possible way. In our industry, we need good systems that give a good general overview fast - and Katana delivers that. Compared to other systems we tried, Katana has been the best from a user-friendliness perspective to follow and track daily activities.”

The challenge they faced

IDC Componentes manage vast amounts of SKUs and orders. Therefore, it is a complex task to follow the production from daily activities to long-term production plans. Before switching to Katana, they used another system that was not working for them. Thus, they made a start to look for a solution to:

Why Katana?

A company producing smart items and lighting technology shouldn't have its production management left in the dark.

"We chose Katana because it presents our manufacturing business information in the easiest possible way. In our industry, we need good systems that give a good general overview fast – and Katana delivers that. Compared to other systems we tried, Katana has been the best from a user-friendliness perspective to follow and track daily activities."

IDC Componentes in numbers
