*"Our overall efficiency has significantly improved. **Katana** is a very user-friendly and easy-to-use system for each of the struggles that we used to have before. Even more, I appreciate the communication when they are developing new tools, they are open to feedback and take our improvements into account."*

About Komali Tortillas

Komali Tortillas is a tortilla factory based in Hamburg, Germany. Komali Tortillas was born from the desire to bring authentic Mexican tortillas to all tables in European homes and restaurants. Their tortillas are made from 100% Mexican corn. Komali Tortilla products are made in Germany and can be purchased in such European countries as Norway, Sweden, Netherlands, France, Spain, Finland, and others.

Komali Tortillas honors the traditional Mexican recipes and guarantees complete satisfaction to their customers - regular consumers and restaurants alike. Their tortillas do not contain animal products, are gluten-free, and are made with non-GMO Mexican corn to cater to various diets and health requirements. Apart from tortillas, one can order also a taco kit, various salsas and dips, and, of course, some Mexican tequila.

Rafael Ysosa, Owner at Komali Tortillas

“Katana knows in real-time if we have enough stock to make the orders that are due to ship soon AND when we need to order more materials to have them in time for orders that are coming due in the future. In addition, Katana is not "too big" for us like a lot of the other solutions we looked at which are designed for traditional mass-production manufacturers.”

The challenge they faced

As a food producer, Komali Tortilla management quickly identified that the food manufacturing operations are complex not only from a production scheduling perspective where they need to manage product recipes, inventory, and operations. A big factor is also **perishable inventory** and compliance with **food-safety requirements**.

At some point, spreadsheets did not cut it anymore and Komali Tortillas set out to improve their processes by:

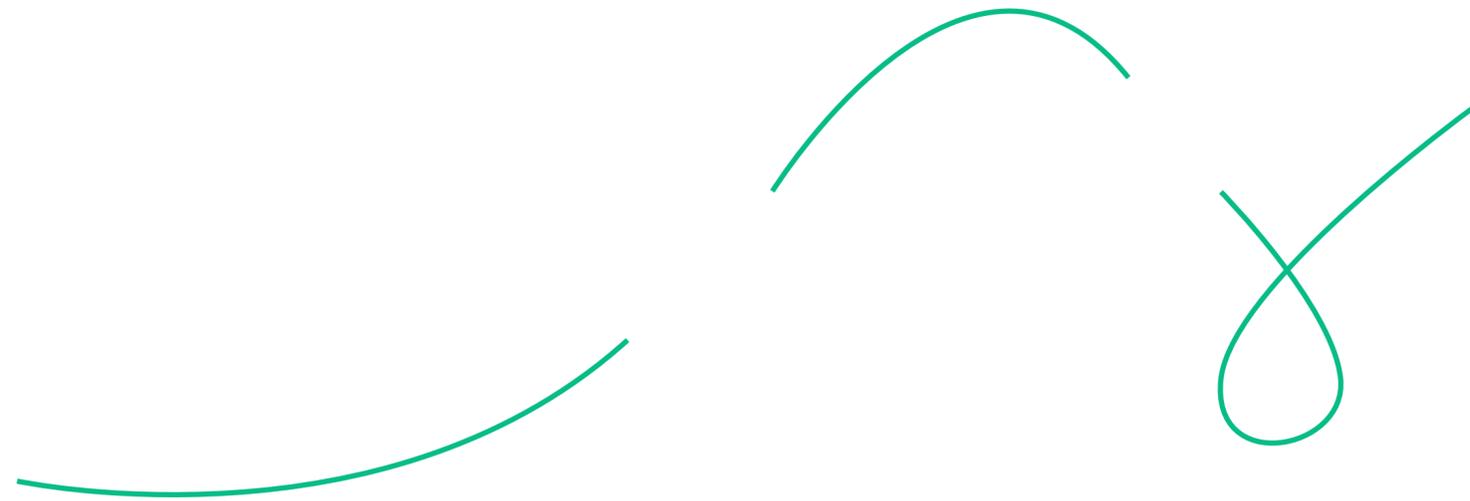

Why Katana?

We often hear that our customers **come over from spreadsheets** mainly due to all the moving parts that they are no longer able to manage manually. Komali Tortillas are one of them, and they also tried other software before choosing Katana.

*"We tried other software as well. However, only Katana could provide visual insight into the production process. **Overall user experience** played a big role in this choice as well. The staff was helpful with implementation, and we seem to have made the right choice."*

How Katana helped

*“Katana knows in real-time if we have enough stock to make the orders that are due to ship soon AND when we need to order more materials to have them in time for orders that are coming due in the future. In addition, Katana is not "too big" for us like a lot of the other solutions we looked at which are designed for traditional mass-production manufacturers. Katana is **the only solution** we found that is made FOR the small, make-to-order manufacturer.”*

Komali Tortillas in numbers

With the help of Katana
their team was able to:

Implemented batch tracking to meet the
safety standards and reduce their risks
