Katana add-ons

Add-ons let you customize your setup and extend the functionality of Katana in a cost-effective way.

Full traceability $199/mo

From the shop floor to the end customer - trace items by their serial number or in batches

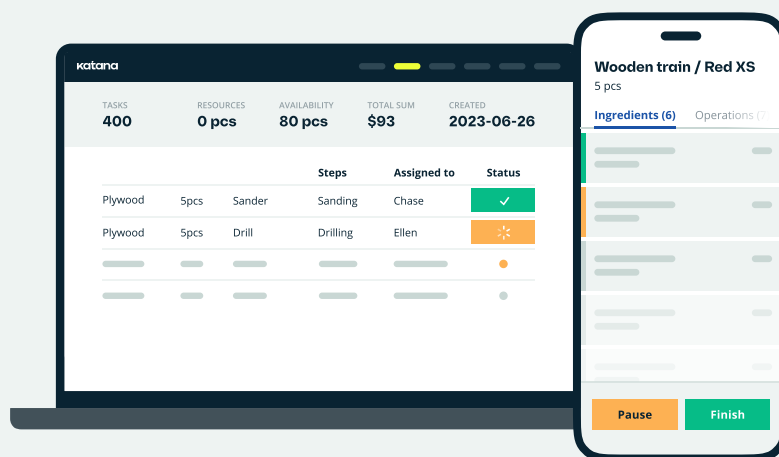

Features included

- **Serial numbers** - track your products using a unique identifier and ensure complete traceability of product history, making warranty support and any potential recalls easier.

- **Batch numbers** - assign batch/lot numbers to purchased and manufactured items and assign expiration dates to batches to gain a better understanding of your item's shelf life.

Advanced manufacturing FROM $199/mo

Track, schedule, and report the progress of manufacturing operations

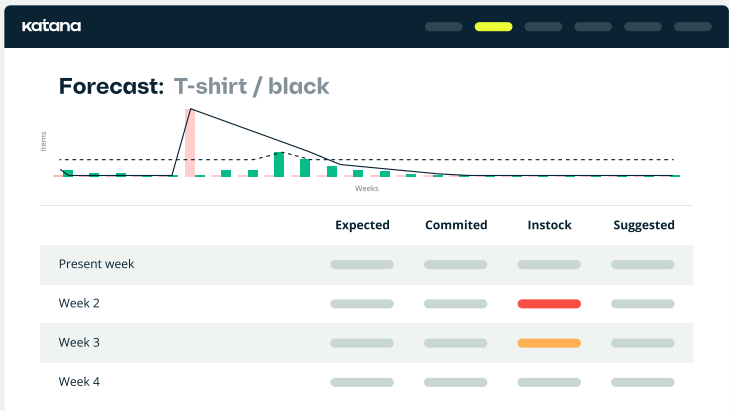

Included features

- **Track operations via the Shop Floor App** - add operators, and discover a useful breakdown of resource and material usage.

- **Manufacturing routings** - establish manufacturing sequences (consecutive or parallel) for your operations.

- **Manufacturing insights** - analyze different manufacturing costs and find a breakdown of resource and material usage.

Planning and forecasting

Safeguard your cash flow while avoiding stockouts and overstocking using the real-time inventory planning and forecasting toolset

Included features

- **Demand planning** - base your decisions on real-time sales data and maintain ideal inventory levels at all times.

- **Demand forecasting** - utilize historical data to proactively order and restock items, prevent stockouts, minimize overstock, and improve your supply chain efficiency.

- **Replenishment planning** - receive calculated replenishment recommendations, set minimum order quantities, and have reorder points calculated automatically.
